### Activity 1a: Intersections

Whether we realize it or not, our daily lives are impacted by vital industries and their services. What starts as an idea in one’s mind may one day turn into a product experienced by billions. Take Apple’s iPhone for example. In fact, there are several stages between concept development (an idea) and the end-user product (what you receive). For example, Apple’s engineers think about the type of material they will use; supply chain managers decide how they will transport and get their products to you; and marketing managers develop unique advertising to catch your attention.

In order to understand and appreciate an industry, and the careers available within it, we must first explore how these products and services impact our lives, our families, and our communities. During this activity, we will take a closer look at the [“Culinary School and Chef Career Concentrations”](#) section. Review the careers and then answer the following questions.

Use the note-catcher on the next page to capture your responses.

## Activity 2: Civic Redevelopment Project

### Directions:

This activity is an exciting way to apply your newly-gained understanding of the Culinary Arts sector. During this activity, you will assume the role of the assigned career path. Read the prompt below, complete the questions below, and document your proposed solution in the [Civic Redevelopment Plan](#).

### Prompt:

New York City's Economic Development Enterprise is hosting a design competition to strengthen vital infrastructure in order to better withstand future challenges and crises. You are a [Restaurant Manager](#), and have been chosen to be part of the team that will design the Food Distribution systems and solutions for your neighborhood (your zip code). Though your blueprint may address city-wide needs, it must address the needs of your zip code. Using your experience and knowledge of the Culinary Arts industry, please propose a system or policy initiative to help the City prevent and/or better respond to future city-wide emergencies. Use the [Civic Redevelopment Plan](#) to document your proposed solution.

Consider the following questions while designing your proposed redevelopment project:

- How long will it take to implement this project design
- Does this project design build off existing systems or is this something new?
- What other professionals (if any) will I need to consult for project completion?

Use the note catcher below to guide your design project efforts.

**Note Catcher Activity 2**

Questions	Answers
Using <a href="#">Google Maps</a> , how many culinary businesses are currently in your zip code?	
Let's highlight a culinary business in your zip code. What is the name of this business and what goods/services do they provide?	
<p><b>Ask Around!</b> Ask a family member to share:</p> <ul style="list-style-type: none"> <li>• What are some benefits of having culinary businesses in the neighborhood?</li> <li>• What are some ways the Culinary industry can better support our neighborhood?</li> </ul>	
<p><b>Project Planning!</b>          What is my redevelopment project idea? Am I designing an immediate initiative, a system improvement or an entirely new system?</p>	
Who do I need to support from? <i>List any professionals or businesses that you can partner with.</i>	
How will they contribute to this project design effort? <i>Be specific</i>	
What type of training would they need?
